Bacolod City

PLATFORM ACCESS AND ROLES MATRIX

Platform accounts and roles | Operations Manual 4.21 | Proposed policy - for validation by the Graduate School

Form code	GS-P-05	Revision no.	00	Effectivity date	

INSTRUCTIONS

1. This document lists the roles that exist in the Graduate School platform, what each can see and do, and how an account is requested, approved, set up, reviewed and removed (request form GS-F-46). The roles are the ones in the platform's role list; the summary was derived on 2026-11-04 from the role gate of each function of the platform, grouped by role.
2. It is a summary, not a list of every function. Where the Handbook or the Research Protocol names an officer who has no role in the platform (the Associate Dean, the Graduate School Secretary), that officer signs on paper.
3. Status: proposed. It takes effect when the Dean signs below.

1. Purpose and principles

1.1 Purpose: to make sure each person sees and does only what the person's work in the Graduate School needs, and that every approval can be traced to a named person (GS-P-03).

1.2 Least privilege: ask for the role that fits the work, not the widest one. One person holds one account and one role. Accounts are never shared. The Administrator role passes every role gate in the platform and acts as Graduate School Staff in workflow steps, so it is limited to the named person who maintains the system (proposed) and is not used for approvals.

2. Roles and what each can see and do

Role	Can see and do	Cannot
Graduate School Staff	Imports the monitoring workbook and class lists; manages the policy library and the business rules; prepares and exports registrar lists; terms and records to fix; reports and the activity log; records the steps they own in each process; keeps faculty records	Take the Dean's decisions; approve in place of the Dean
Academic Coordinator	Student monitoring and study plans; course offerings and course adjustment plan; subject status; Form 1 endorsement; graduation coursework check; practicum, comprehensive examination and absence-without-leave records; reports; faculty records	Upload to the policy library; import the admission handoff; take the Dean's decisions
Research Coordinator	Research gates; panel matching and invitations; defense scheduling; adviser appointments; availability requests; validation of research documents for graduation; reports	See enrollment and leave cases outside the research steps
Dean	Decisions and approvals: onboarding reports, term course offering plan, leave, readmission, withdrawal and absence cases, adviser appointments, graduation endorsement and the endorsed list; reports and decision support; policy questions	Edit records; see the work of other roles beyond the cases that reach the Dean
Faculty Member	Own profile, course preferences, availability and calendar link; replies to panel invitations; adviser requests; defense schedules and verdicts of own panels; policy questions	See student records beyond the own panels; see other faculty members' details
Student	Own record, requests and attachments, adviser, research evidence, defense calendar, messages; questions about the own record and policy	See any other student; decide any request
Administrator	Every function (passes all role gates); acts as Graduate School Staff in workflow steps	Not for approvals (proposed rule)

3. Account lifecycle (proposed)

3.1 Request: the person fills GS-F-46; the head of the person's office endorses; the Dean approves. Nobody receives an account without the Dean's approval, except a student, whose account is created by the platform when the student is handed off from admission.

3.2 Set-up as the platform works today: a student account is created at the admission handoff import; a faculty login is created by Graduate School Staff or an Academic Coordinator from the Faculty page with a temporary password; the other roles are set up by the administrator, because the platform has no

screen to create them. The temporary or generated password is handed over privately and must be replaced at first sign-in (at least 10 characters, not the email name).

3.3 First sign-in: choose a new password, then read and accept the privacy notice (GS-P-04, GS-F-45). The acceptance is stored once per account with the notice version.

3.4 Review: each term, the Academic Coordinators and the Graduate School Staff check the list of accounts against the people who still hold the role (proposed). A change of role uses GS-F-46.

3.5 Removal: when a person leaves the Graduate School or the role, GS-F-46 asks for the account to be deactivated the same day. A deactivated account cannot sign in; its log entries stay.

4. Rules for every account holder

4.1 Use your own account only; do not share the password; sign out on a shared computer. Tell the Graduate School at once if you think someone else used your account. The demonstration accounts are for presenting the platform and have no authority (GS-P-03).

4.2 The platform slows repeated wrong passwords, ends the session at sign-out, and refuses a function the role is not allowed (message: this account cannot access that area).

5. Open points for the Graduate School

5.1 The role gates are by role, not by program: the code reviewed does not limit an Academic Coordinator to one program, although the Handbook gives each coordinator a program area. Should it?

5.2 Should the Associate Dean and the Graduate School Secretary receive roles? Who is the named administrator? How often should accounts be reviewed?

Review and approval

Role and action	Printed name	Signature	Date
Prepared by Capstone group CAP-IT1 (platform project)			
Reviewed by Academic Coordinators of the five program areas and Graduate School Staff (to be confirmed)			
Approved by Graduate School Dean
